

## INVITATION: High-Level Policy Dialogue on “Artificial Intelligence and Democracy: Contemporary Challenges and Perspectives”

**Date:** Thursday 30 May – Friday 31 May 2024

**Venue:** Elinor Ostrom, Buontalenti, European University Institute (Florence)

**Convener:** Daniel Innerarity | Chair in Artificial Intelligence and Democracy at the EUI School of Transnational Governance

Dear Dr. Ljubisa Bojic,

I am delighted to invite you to participate in a High-Level Policy Dialogue on “**Artificial Intelligence and Democracy: Contemporary Challenges and Perspectives**” organised by the Chair in Artificial Intelligence and Democracy School of the EUI School of Transnational Governance.

The policy dialogue will be hosted at the European University Institute, Florence on Thursday 30 May – Friday 31 May 2024.

The rapid growth of Artificial Intelligence (AI) and its impact on society is a crucial topic for the future of world democracies. The High-Level Policy Dialogue will explore key aspects shaping the relationship between AI and democracy, addressing questions such as:

- How are Artificial Intelligence and Democracy connected, if at all?
- Is AI a challenge to democracy?
- How can we transform AI into a valuable tool that strengthens democratic structures worldwide?

The STG High-Level Policy Dialogues serve as a platform for representatives from various sectors to openly discuss policy issues and explore new approaches. The event will bring together academics, policymakers, officials, and civil society members to discuss the priorities of the STG Chair in Artificial Intelligence and Democracy on a global scale. Participation is by invitation only, and discussions adhere to the Chatham House Rule, ensuring confidentiality. The outcomes will inform a policy brief published by the organizers as part of their public mission.

Your contribution would be extremely important to the success of the policy dialogue, and we would be honoured to have you participate. We would be delighted whether you can prepare a **short presentation** of about 10 minutes concerning the above-mentioned questions within the area of AI and Democracy.

We kindly ask you to please confirm your availability to participate by responding to [loannis.Galariotis@eui.eu](mailto:loannis.Galariotis@eui.eu).

A provisional programme will duly follow.

For further information, please contact Professor Daniel Innerarity and/or Dr. Ioannis Galariotis at [loannis.Galariotis@eui.eu](mailto:loannis.Galariotis@eui.eu).

Thank you in advance and we look forward to hearing from you.

Sincerely,

Professor Daniel Innerarity  
Chair in Artificial Intelligence and Democracy, STG, EUI
